Boost Your Industrial Automation With Our Adaptable and Reliable Computers

Data from endpoint devices is exponentially increasing. System builders, integrators, and plant operators have to face the challenge of leveraging this data and computing technology to improve operational efficiency through various system automations and integrations.

Moxa offers a new generation of BXP/DRP/RKP Series industrial computers that focus on rapid system development to support scalable, flexible, reliable, and cost-effective computing solutions. The new x86 industrial computers are built with a pre-formulated configure-to-order architecture and come with a 3-year warranty to easily meet diverse system development and integration requirements.

The BXP/DRP/RKP Series industrial computers offer 75 bare-bones models as a starting point. Through simple selections, you can quickly choose from a list of predefined form factors, processors, and data interfaces. Our configure-to-order (CTO) service offers a variety of operating system, memory, and storage options, making system assembly easier than ever.

You can easily create a ready-to-use industrial computer for your needs by placing a CTO order with us. System integrators and machine builders can build customized solutions with the necessary computing, connectivity, and communication elements, enabling faster and easy fulfillment of automation scenarios.

Adaptable

The new x86 IPC family offers 75 bare-bones models, helping customers quickly identify the right ready-to-use solution through a 4-step selection process, reducing time to market and costs.

- Versatile portfolio meets most industrial-automation requirements
- Configure-to-order service (CTOS) for OS, memory, and storage
- 4 simple steps to identify a best fit

Customization Friendly

As industrial applications evolve, their requirements are changing. We at Moxa strive to provide you with tailor-made solutions that best meet your needs even for an order with significantly lower number of units. Leveraging the modular architecture of the new x86 IPCs, our product development team is adept at quickly developing a solution that can meet your specific needs.

- Favorable customization criteria and service
- Modular design enables flexible customization
- Shorter prototyping and customization process

Reliable and Durable

With over 35 years of industrial automation expertise, we are committed to providing our customers with maximum value and success through durable quality, long-term supply and in-time support services.

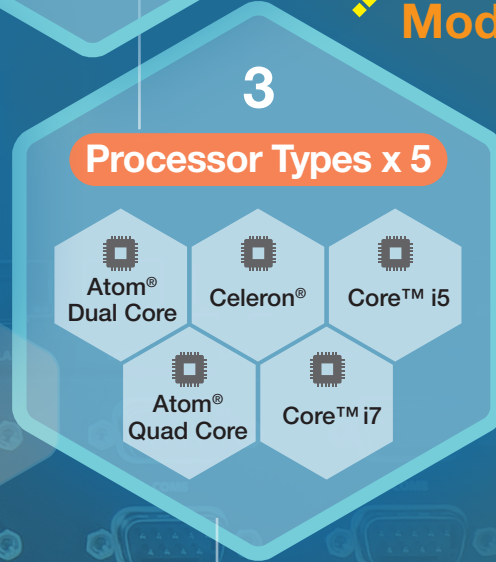

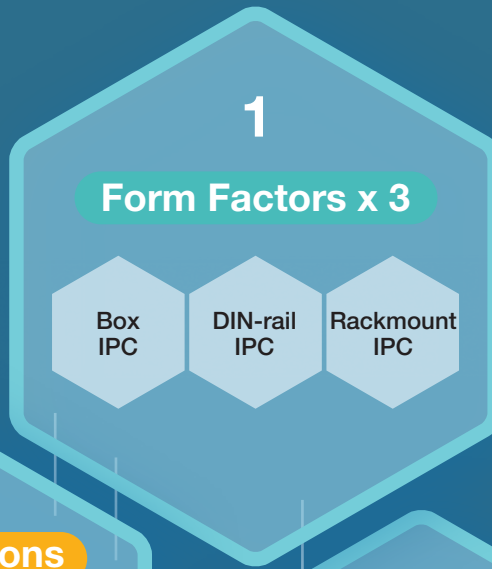

- 3-year Moxa warranty for product quality
- 10-year product longevity* commitment
- Moxa's industry-renowned post-sales service

✓ 4-step Solution Formulation for Fast System Development

Simply specify your requirements in three steps to find the computing solution that fits your application from an array of DRP/BXP/RKP Series industrial computers.

1 Select a form factor.

Which computer model can be easily installed in the current system space without requiring additional brackets?

Box
IPC

DIN-rail
IPC

Rackmount
IPC

2 Select interface combinations.

Which devices need to be connected to the computer, and what types of interfaces are necessary for these connections?

Ethernet

Serial

Video

USB

DI / DO

3 Select a processor.

Considering your application's data collection and processing requirements, which processor is most suitable for driving optimal performance?

Atom®
Dual core

Celeron®

Core® i5

Atom®
Quad core

Core® i7

4 Select the final pieces to complete your system.

Save time and cost with our configure-to-order options that get your system ready for use.
